

Introduction

Display Mounting Arms For Newall Readouts

Newall's new mounting arms provide a sturdy and attractive way of fixing the readout to a machine. The arms incorporate cable management to make installation easier and decrease the possibility of cable snags. There are arms for all types of machines and to insure there is an option to suit any machine, each part is universally compatible with all others in the arm range. The four main parts and examples of their compatibility are shown below.

Specification

- » High pressure die cast aluminum construction
- » Durable polyester powder painted
- » Imperial and metric mounting screws supplied as necessary
- » Jacking points supplied for alignment purposes
- » Compatible with all Newall DRO equipment

Benefits of Display Mounting Arms

- » Built-in cable management (zip tie points)
